

The dashboard I created for a local small business. As you can see, I used 4 different visualizations as well as a slicer in the bottom left to filter. On the right is the file containing this data I uploaded along with the specific elements I chose to incorporate in the visualizations.

This is a filtered view of the dashboard showing only the data for Afternoon Tea throughout the year.

This page shows the filtered Afternoon Tea data from the previous page with an additional filter of displaying data only from Q4.
